

Important information to remember when submitting parts for cleaning

Quotes and Estimates

At Pro-Tech we aim to keep as close to the listed prices as possible.

All of our customers will be given a full estimate once we have seen the item/items and our estimates will be valid for a full 30 days.

Prices quoted will be subject to change upon inspecting parts when received. Although it is unlikely for the price to change you will always be contacted before any additional work is completed.

Preparing your items for cleaning

Your items will need to be degreased and all bearings/seals removed when submitting your items for cleaning. If needed we can provide you with a quote upon request for us to provide this service.

Packing and Shipping

Please ensure that you have packaged your items well so that they are not damaged during transit as we will package your items the same when returning them. Any damage or loss to your items that may occur during transit will be liable with the courier.
